

GIBBS GREEN SCHOOL

GIBBS GREEN SCHOOL

Brief: Feasibility for a SEBN New build and Refurbishment
 Client: Langford Primary School and Gibbs Green School
 Budget: Confidential
 Architect: Surface to Air Architects

The design for the re-location of Gibbs Green School is imagined as a contemporary build that is inviting, secure, domestic in scale and sustainable. The idea was to create a truly inspirational work and play zone both internally and externally, with a focus on educating the children about sustainability and green technology. The design uses green walls and roofs, planting, hard landscaping and patterned glass.
